Information About Risk: **Equity Securities Risk.** Since the IVS International Large ETF invests in equity securities, it is subject to the risk that stock prices will fall over short or extended periods of time. Historically, the equity markets have moved in cycles, and the value of the IVS International Large ETF's equity securities may fluctuate from day to day. Individual companies may report poor results or be negatively affected by industry and/or economic trends and developments. The prices of securities issued by such companies may suffer a decline in response. These factors contribute to price volatility, which is a principal risk of investing in the IVS International Large ETF. **Market Risk.** The value of securities in the IVS International Large ETF's portfolio will fluctuate and, as a result, the IVS International Large ETF's share price may decline suddenly or over a sustained period. The equity securities purchased by the IVS International Large ETF may involve large price swings and potential for loss. **Management Risk.** The strategies used by the Adviser may fail to produce the intended result. **Large Cap Risk.** Larger, more established companies may be unable to attain the high growth rates of successful, smaller companies during periods of economic expansion. **Risks of Investment Selection and Asset Allocation.** The IVS International Large ETF's investment success depends on the skill of the Adviser in evaluating, selecting and monitoring the portfolio assets. If the Adviser's conclusions about growth rates or securities values are incorrect, the IVS International Large ETF may not perform as anticipated.
