FUND SUMMARY

Applied Finance Dividend Fund

Investment Objective

The investment objective of the Applied Finance Dividend Fund (the “Dividend Fund”) is dividend income and long-term capital appreciation.

Fees and Expenses of the Dividend Fund

This table describes the fees and expenses that you may pay if you buy, hold and sell shares of the Dividend Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the tables and example below.**

	Investor Class	Institutional Class
Shareholder Fees <i>(fees paid directly from your investment)</i>	None	None
Annual Operating Expenses <i>(expenses that you pay each year as a percentage of the value of your investment)</i>		
Management Fees	0.90%	0.90%
Distribution (12b-1) and Service Fees	0.25%	None
Other Expenses:		
Shareholder Services Plan	0.18%	0.03%
Other Expenses ⁽¹⁾	0.51%	0.53%
Total Other Expenses	0.69%	0.56%
Total Annual Fund Operating Expenses	1.84%	1.46%
Less Fee Waivers and/or Expense Reimbursements ⁽²⁾	(0.64)%	(0.51)%
Total Annual Fund Operating Expenses After Fee Waivers and/or Expense Reimbursements ⁽²⁾	1.20%	0.95%

⁽¹⁾ Other Expenses do not reflect 0.02% of certain costs of preparing, printing and mailing the Fund’s Proxy Statement and related proxy materials and all other costs incurred in connection with the solicitation of proxies for the Fund’s Shareholders’ Meeting.

⁽²⁾ Applied Finance Advisors, LLC (the “Adviser”) has entered into a written expense limitation agreement under which it has agreed to limit the total expenses of the Dividend Fund (exclusive of interest, expenses incurred under a plan of distribution adopted pursuant to the Rule 12b-1 under the Investment Company Act of 1940 (the “1940 Act”), taxes, acquired fund fees and expenses, brokerage commissions, dividend expenses on short sales, and other extraordinary expenses not incurred in the ordinary course of business) to an annual rate of 0.95% of the daily net assets of the Dividend Fund. Each waiver and/or reimbursement of an expense by the Adviser is subject to repayment by the Dividend Fund within thirty-six months following the date such waiver and/or reimbursement was made, provided that the Dividend Fund is able to make the repayment without exceeding the expense limitation in place at the time of the waiver or reimbursement and at the time the waiver or reimbursement is recouped. This expense limitation agreement may not be terminated prior to September 1, 2027, unless mutually agreed to in writing by the parties.

Example:

The following example is intended to help you compare the cost of investing in the Dividend Fund with the cost of investing in other mutual funds.

The example assumes that you invest \$10,000 in the Dividend Fund for the time periods indicated and then redeem all your shares at the end of those periods. The example also assumes that your investment has a 5% return each year, and that the Dividend Fund's operating expenses remain the same. The effect of the Adviser's agreement to waive fees and/or reimburse expenses is only reflected in the first year of each example shown below. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

Share class	1 Year	3 Years	5 Years	10 Years
Investor Class	\$122	\$516	\$936	\$2,106
Institutional Class	\$97	\$412	\$749	\$1,703

For both share classes, your expenses would be the same as in the table above if you did not redeem your shares at the end of each period.

Portfolio Turnover

The Dividend Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Dividend Fund shares are held in a taxable account. These costs, which are not reflected in Total Annual Fund Operating Expenses or in the example, affect the Dividend Fund's performance. During the most recent fiscal year ended April 30, 2026, the Dividend Fund's portfolio turnover rate was 13.57% of the average value of its portfolio.

Principal Investment Strategies

To achieve its investment objective, the Dividend Fund will under normal conditions invest at least 80% of its net assets (including the amount of borrowing for investment purposes) in dividend-paying common and preferred stock of companies. Generally, the companies in which the Dividend Fund will invest will have market capitalizations of \$3 billion or more, measured at the time of purchase. The Fund invests primarily in the securities of issuers that the Adviser believes to have attractive valuations, potential for long-term growth, sustainable dividends, and other attractive financial characteristics.

The Adviser has developed a detailed, proprietary analytical methodology called the Economic Margin[®] framework to evaluate a company's corporate performance and estimate its intrinsic value. The Adviser believes that intrinsic value better explains historical stock returns than other commonly used financial metrics.

The Adviser uses this framework to evaluate a company's corporate performance across time and against peers, as well as to determine attractive stocks for purchase.

In addition to a firm's attractiveness from the Economic Margin[®] perspective, the Adviser will also consider as deemed necessary the use of other financial metrics such as price multiples, financial accounting ratios, price movements, and qualitative information discovered through company presentations and third-party research providers.

The Dividend Fund seeks to diversify its investments across a broad spectrum of economic sectors to reduce portfolio volatility and investment risk without sacrificing potential returns. In selecting securities within a particular economic sector, the Adviser's goal is to identify companies that it believes have the potential for superior performance within each sector. Although the Dividend Fund invests across a broad spectrum of sectors, it may at times focus its investments in certain sectors.

The Dividend Fund may also invest in small and mid-cap companies, convertible securities, preferred stocks, rights and warrants, and other investment companies, including exchange-traded funds ("ETFs").

The Adviser will typically sell a company from the Dividend Fund's portfolio when the company's stock price exceeds the Adviser's estimate of the company's fundamental value and/or there are other companies that the Adviser believes offer greater investment potential.

The Fund may invest on a global basis to take advantage of investment opportunities both within the United States and other countries. The Fund may buy foreign securities directly in their principal markets or indirectly through the use of depository receipts.

Principal Risks

The principal risk of investing in the Dividend Fund is that the value of its investments is subject to market, economic and business risk that may cause the Dividend Fund's net asset value ("NAV") to fluctuate over time. Therefore, the value of your investment in the Dividend Fund could decline and you could lose money. There is no assurance that the Adviser will achieve the Dividend Fund's investment objective. An investment in the Dividend Fund is not a bank deposit and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The Dividend Fund is also subject to the following additional principal risks:

Equity Securities Risk. Since it purchases equity securities, the Dividend Fund is subject to the risk that stock prices will fall over short or extended periods of time. Historically, the equity markets have moved in cycles, and the value of the Dividend Fund's equity securities may fluctuate from day to day. Individual companies may report poor results or be negatively affected by industry and/or economic trends and developments. The prices of securities issued by such companies may suffer a decline in response. These factors contribute to price volatility, which is a principal risk of investing in the Dividend Fund.

Market Risk. The value of securities in the Dividend Fund's overall portfolio will fluctuate and, as a result, the Dividend Fund's share price may decline suddenly or over a sustained period.

Management Risk. The strategies used by the Adviser may fail to produce the intended result.

Large Cap Risk. Larger, more established companies may be unable to attain the high growth rates of successful, smaller companies during periods of economic expansion.

Small and Mid-Cap Risk. Investing in the securities of small and mid-cap companies generally involves greater risk than investing in larger, more established companies. Although investing in securities of smaller companies offers potential above-average returns if the companies are successful, the risk exists that the companies will not succeed and the prices of the companies' shares could significantly decline in value. The earnings and prospects of smaller companies are generally more volatile than larger companies, and smaller companies may experience higher failure rates than do larger companies. The trading volume of securities of smaller companies is normally less than that of larger companies and, therefore, may disproportionately affect their market price, tending to make prices fall more in response to selling pressure than is the case with larger companies. Smaller companies may also have limited markets, product lines, or financial resources, and may lack management experience.

Risks of Investment Selection and Asset Allocation. The Dividend Fund's investment success depends on the skill of the Adviser in evaluating, selecting, and monitoring the portfolio assets. If the Adviser's conclusions about growth rates or securities values are incorrect, the Dividend Fund may not perform as anticipated.

Risk of Other Equity Securities. Other equity securities in which the Fund may invest include convertible securities, preferred securities, rights and warrants.

Convertible Securities. Convertible securities are subject to the risks and price fluctuations of the underlying stock. They may be subject to the risk that the issuer will not be able to pay interest or dividends when due and their market value

may change based on changes in the issuer's credit rating or the market's perception of the issuer's creditworthiness. Some convertible preferred stocks have a conversion or call feature that allows the issuer to redeem the stock before the conversion date, which could diminish the potential for capital appreciation on the investment.

Preferred Securities. The fixed dividend rate of preferred stocks may cause their prices to behave more like those of debt securities. If interest rates rise, the value of preferred stock having a fixed dividend rate tends to fall. Preferred stock generally ranks behind debt securities in claims for dividends and assets of the issuer in a liquidation or bankruptcy.

Rights and Warrants. The price of a warrant does not necessarily move parallel to the price of the underlying security and is generally more volatile than that of the underlying security. Rights are similar to warrants, but normally have a shorter duration. The market for rights or warrants may be very limited and it may be difficult to sell them promptly at an acceptable price. Rights and warrants have no voting rights, receive no dividends and have no rights with respect to the assets of the issuer.

Investment Company Securities Risk. When the Dividend Fund invests in other investment companies, including ETFs, it indirectly bears its proportionate share of fees and expenses paid by the underlying fund, which results in higher Dividend Fund expenses. The Dividend Fund may be affected by losses of underlying funds and the level of risk arising from their investment practices.

ETF Risk. ETFs generally are investment companies whose shares represent an interest in a portfolio of securities. Some ETFs are designed to track various market indexes. Because the Dividend Fund may invest in ETFs, it is subject to additional risks that do not apply to conventional mutual funds, including the risks that the market price of an ETF's shares may trade at a discount to its NAV, an active secondary market may not develop or be maintained, or trading may be halted by the exchange in which they trade, which may impact the Dividend Fund's ability to sell its shares.

Sector Risk. Sector risk is the possibility that securities within the same group of industries will decline in price due to sector-specific market or economic developments. If the Fund invests more heavily in a sector, the value of its shares may be especially sensitive to factors and economic risks that specifically affect that sector.

Foreign Securities Risks. Investing in securities of foreign companies and countries involves certain considerations and risks that are not typically associated with investing in U.S. government securities and securities of domestic companies. There may be less publicly available information about a foreign issuer than a domestic one, and foreign companies are not generally subject to uniform accounting, auditing and financial standards and requirements comparable to those applicable to U.S. companies. There may also be less government supervision and regulation of foreign securities exchanges, brokers and listed companies than exists in the United States. Interest and dividends paid by foreign issuers may be subject to withholding and other foreign taxes, which may decrease the net return on such investments as compared to dividends and interest paid to the Fund by domestic companies or the U.S. government. There may be the possibility of expropriations, seizure or nationalization of foreign deposits, confiscatory taxation, political, economic or social instability or diplomatic developments that could affect assets of the Fund held in foreign countries. The establishment of exchange controls or other foreign governmental laws or restrictions could adversely affect the payment of obligations. In addition, investing in foreign securities will generally result in higher commissions than investing in similar domestic securities.

Performance Information

The Dividend Fund was reorganized on May 8, 2015 from a series of Unified Series Trust, an Ohio business trust (the "Predecessor Fund"), to a series of the World Funds Trust, a Delaware statutory trust (the "Reorganization"). While the Dividend Fund is substantially similar to the Predecessor Fund and theoretically would have invested in the same portfolio of securities, the Dividend Fund's performance may be different than the performance of the Predecessor Fund due to, among other things, differences in fees and expenses.

The bar chart below shows changes in the Dividend Fund's annual returns for the Investor Class shares (previously the Retail Class shares) (the Class with the longest period of annual returns) from year to year. The performance of Institutional Class shares will differ due to differences in expenses.

The table below shows how the Predecessor Fund’s and the Dividend Fund’s average annual returns for the periods indicated compare over time to those of a broad-based securities market index, the Morningstar® US Market IndexSM (TR), and the Morningstar® US Large-Mid Value Market IndexSM (TR), which is the Fund’s secondary index. The table also presents the impact of taxes on the Dividend Fund’s Investor Class shares. Performance for the Investor Class for periods prior to September 15, 2017 reflects the performance of the Retail shares of the Predecessor Fund and Dividend Fund. On September 15, 2017, the Retail shares of the Dividend Fund were reorganized into the Investor Class shares of the Dividend Fund.

This information provides some indication of the risks of investing in the Dividend Fund. Past performance of the Dividend Fund is not necessarily an indication of how it will perform in the future. Updated performance information is available by calling toll-free 800-673-0550.

Investor Class Year-by-Year Annual Returns as of December 31st

During the period shown, the highest quarterly return was 21.55% (quarter ended June 30, 2020) and the lowest quarterly return was -29.32% (quarter ended March 31, 2020).

Year to date return as of June 30, 2026 was 6.95% .

Average Annual Returns for the Periods Ended December 31, 2025

Return Before Taxes	1 Year	5 Years	10 Years	Since Inception⁽¹⁾
Investor Class shares	10.33%	9.82%	10.66%	8.27%
Institutional Class shares	10.58%	10.09%	10.93%	11.75%
Return After Taxes – Investor Class Shares				
Return After-Taxes on Distributions	9.44%	6.36%	7.55%	6.37%
Return After-Taxes on Distributions and Sale of Fund Shares	6.12%	6.79%	7.68%	6.29%
Morningstar® US Market Index SM (TR) (reflects no deduction for fees, expenses or taxes) ⁽²⁾	17.35%	13.29%	14.40%	10.91%
Morningstar® US Large-Mid Value Market Index SM (TR) (reflects no deduction for fees, expenses or taxes)	17.67%	13.01%	11.25%	8.10%

⁽¹⁾ Investor Class shares commenced operations on June 2, 2006 and Institutional Class shares commenced operations on September 1, 2009.

⁽²⁾ In connection with adopted SEC regulations applicable to the Fund, the Morningstar® US Market IndexSM (TR) is the Fund's broad-based securities market index. The Fund will continue to show performance for the Morningstar® US Large-Mid Value Market IndexSM (TR), the Fund's previous broad-based securities market index.

After-tax returns are shown for the Investor Class shares only. After-tax returns for the Institutional Class shares will vary. After-tax returns are calculated using the historical highest marginal individual U.S. federal income tax rates in effect and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown. After-tax returns shown are not relevant to investors who hold their Dividend Fund shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts ("IRAs"), in which case you will generally be taxed upon withdrawal of monies from the tax-deferred arrangement. The index returns presented above assume reinvestment of all distributions and exclude the effect of taxes and fees (if expenses and taxes were deducted, the actual returns of the indices would be lower).

Investment Adviser

Applied Finance Advisors, LLC serves as the investment adviser to the Dividend Fund. The Dividend Fund considers Applied Finance Valuation Large Cap ETF, which is advised by Applied Finance Advisors, LLC, to be part of the "same group of investment companies" under Section 12(d)(1)(G) of the 1940 Act and Rule 12d1-4 under the 1940 Act for the purchase of shares of other investment companies.

Portfolio Managers

Mr. Paul Blinn, Managing Member of the Adviser, and Mr. Rafael Resendes, Managing Member of the Adviser, have served as the Portfolio Managers to the Dividend Fund since June 2006.

For important information about purchase and sale of fund shares, tax information and financial intermediary compensation, please turn to the sections of this prospectus entitled "Purchase and Sale of Fund Shares", "Tax Information" and "Payments to Broker-Dealers and Other Financial Intermediaries".

FUND SUMMARY

Applied Finance Explorer Fund

Investment Objective

The investment objective of the Applied Finance Explorer Fund (the “Explorer Fund”) is long-term capital appreciation.

Fees and Expenses of the Explorer Fund

This table describes the fees and expenses that you may pay if you buy, hold and sell shares of the Explorer Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the tables and example below.**

	Investor Class	Institutional Class
Shareholder Fees <i>(fees paid directly from your investment)</i>	None	None
Annual Operating Expenses <i>(expenses that you pay each year as a percentage of the value of your investment)</i>		
Management Fees	1.14%	1.14%
Distribution (12b-1) and Service Fees	0.25%	None
Other Expenses:		
Shareholder Services Plan	0.14%	0.07%
Other Expenses ⁽¹⁾	<u>0.12%</u>	<u>0.12%</u>
Total Other Expenses	0.26%	0.19%
Total Annual Fund Operating Expenses	<u>1.65%</u>	<u>1.33%</u>
Less Fee Waivers and/or Expense Reimbursements ⁽²⁾	(0.57)%	(0.50)%
Total Annual Fund Operating Expenses After Fee Waivers and/or Expense Reimbursements ⁽²⁾	<u>1.08%</u>	<u>0.83%</u>

⁽¹⁾ Other Expenses do not reflect 0.01% of certain costs of preparing, printing and mailing the Fund’s Proxy Statement and related proxy materials and all other costs incurred in connection with the solicitation of proxies for the Fund’s Shareholders’ Meeting.

⁽²⁾ The Adviser has entered into a written expense limitation agreement under which it has agreed to limit the total expenses of the Explorer Fund (exclusive of interest, expenses incurred under a plan of distribution adopted pursuant to the Rule 12b-1 under the 1940 Act, taxes, acquired fund fees and expenses, brokerage commissions, dividend expenses on short sales, and other extraordinary expenses not incurred in the ordinary course of business) to an annual rate of 0.83% of the daily net assets of the Explorer Fund. Each waiver and/or reimbursement of an expense by the Adviser is subject to repayment by the Explorer Fund within thirty-six months following the date such waiver and/or reimbursement was made, provided that the Explorer Fund is able to make the repayment without exceeding the expense limitation in place at the time of the waiver or reimbursement and at the time the waiver or reimbursement is recouped. This expense limitation agreement may not be terminated prior to September 1, 2027, unless mutually agreed to in writing by the parties.

Example:

The following example is intended to help you compare the cost of investing in the Explorer Fund with the cost of investing in other mutual funds.

The example assumes that you invest \$10,000 in the Explorer Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes that your investment has a 5% return each year, and that the Explorer Fund's operating expenses remain the same. The effect of the Adviser's agreement to waive fees and/or reimburse expenses is only reflected in the first year of each example shown below. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

Share class	1 Year	3 Years	5 Years	10 Years
Investor Class	\$110	\$465	\$843	\$1,907
Institutional Class	\$85	\$372	\$681	\$1,558

For both share classes, your expenses would be the same as in the table above if you did not redeem your shares at the end of each period.

Portfolio Turnover

The Explorer Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Explorer Fund shares are held in a taxable account. These costs, which are not reflected in Total Annual Explorer Fund Operating Expenses or in the example, affect the Explorer Fund's performance. During the most recent fiscal year ended April 30, 2026, the Explorer Fund's portfolio turnover rate was 38.70% of the average value of its portfolio.

Principal Investment Strategies

The Explorer Fund invests primarily in the equity securities of small and middle capitalization companies, which the Fund defines as issuers with market capitalizations of less than \$15 billion, measured at the time of purchase.

Equity securities in which the Explorer Fund may invest include common and preferred stocks, rights and warrants, and securities convertible into equity securities.

In choosing investments, the Adviser typically selects equity securities that it believes offer superior return potential and may consider, among other factors, a company's valuation, projected future earnings, growth potential, recent performance, and business strategy.

The Explorer Fund seeks to diversify its investments across a broad spectrum of economic sectors to reduce portfolio volatility and investment risk without sacrificing potential returns. In selecting securities within a particular sector, the Adviser's goal is to identify companies that it believes have the potential for superior performance within each sector.

The Explorer Fund may have a high degree of turnover in its investment portfolio, which may increase its costs and adversely affect the Explorer Fund's performance.

The Explorer Fund may also invest in other investment companies, including ETFs.

The Adviser will typically sell a company from the Explorer Fund's portfolio when the company's stock price exceeds the Adviser's estimate of the company's fundamental value and/or there are other companies that the Adviser believes offer greater investment potential.

Principal Risks

The principal risk of investing in the Explorer Fund is that the value of its investments is subject to market, economic and business risk that may cause the Explorer Fund's NAV to fluctuate over time. Therefore, the value of your investment in the Explorer Fund could decline and you could lose money. There is no assurance that the Adviser will achieve the Explorer Fund's investment objective. An investment in the Explorer Fund is not a bank deposit and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The Explorer Fund is also subject to the following additional principal risks:

Equity Securities Risk. Since it purchases equity securities, the Explorer Fund is subject to the risk that stock prices will fall over short or extended periods of time. Historically, the equity markets have moved in cycles, and the value of the Explorer Fund's equity securities may fluctuate from day to day. Individual companies may report poor results or be negatively affected by industry and/or economic trends and developments. The prices of securities issued by such companies may suffer a decline in response. These factors contribute to price volatility, which is the principal risk of investing in the Explorer Fund.

Market Risk. The value of securities in the Explorer Fund's overall portfolio will fluctuate and, as a result, the Explorer Fund's share price may decline suddenly or over a sustained period.

Management Risk. The strategies used by the Adviser may fail to produce the intended result.

Small and Middle Cap Risk. Investing in the securities of smaller companies generally involves greater risk than investing in larger, more established companies. Although investing in securities of smaller companies offers potential above-average returns if the companies are successful, the risk exists that the companies will not succeed and the prices of the companies' shares could significantly decline in value. The earnings and prospects of smaller companies are generally more volatile than larger companies, and smaller companies may experience higher failure rates than do larger companies. The trading volume of securities of smaller companies is normally less than that of larger companies and, therefore, may disproportionately affect their market price, tending to make prices fall more in response to selling pressure than is the case with larger companies. Smaller companies may also have limited markets, product lines, or financial resources, and may lack management experience.

Risks of Investment Selection and Asset Allocation. The Explorer Fund's investment success depends on the skill of the Adviser in evaluating, selecting and monitoring the portfolio assets. If the Adviser's conclusions about growth rates or securities values are incorrect, the Explorer Fund may not perform as anticipated.

Risk of Other Equity Securities. Other equity securities in which the Fund may invest include convertible securities, preferred securities, rights and warrants.

Convertible Securities. Convertible securities are subject to the risks and price fluctuations of the underlying stock. They may be subject to the risk that the issuer will not be able to pay interest or dividends when due and their market value may change based on changes in the issuer's credit rating or the market's perception of the issuer's creditworthiness. Some convertible preferred stocks have a conversion or call feature that allows the issuer to redeem the stock before the conversion date, which could diminish the potential for capital appreciation on the investment.

Preferred Securities. The fixed dividend rate of preferred stocks may cause their prices to behave more like those of debt securities. If interest rates rise, the value of preferred stock having a fixed dividend rate tends to fall. Preferred stock generally ranks behind debt securities in claims for dividends and assets of the issuer in a liquidation or bankruptcy.

Rights and Warrants. The price of a warrant does not necessarily move parallel to the price of the underlying security and is generally more volatile than that of the underlying security. Rights are similar to warrants, but normally have a shorter duration. The market for rights or warrants may be very limited and it may be difficult to sell them promptly at an acceptable price. Rights and warrants have no voting rights, receive no dividends and have no rights with respect to the assets of the issuer.

Investment Company Securities Risk. The Explorer Fund may invest in other investment companies, including ETFs. By investing in other investment companies, the Explorer Fund indirectly pays a portion of the expenses and brokerage costs of these companies as well as its own expenses. Also, federal securities laws impose limits on such investments, which may affect the ability of the Explorer Fund to purchase or sell these shares.

ETF Risk. ETFs generally are investment companies whose shares represent an interest in a portfolio of securities. Some ETFs are designed to track various market indexes. Because the Explorer Fund may invest in ETFs, it is subject to additional risks that do not apply to conventional mutual funds, including the risks that the market price of an ETF's shares may trade at a discount to its NAV, an active secondary market may not develop or be maintained, or trading may be halted by the exchange in which they trade, which may impact the Explorer Fund's ability to sell its shares.

Portfolio Turnover Risk. The Explorer Fund may, at times, have a portfolio turnover rate that is higher than other stock funds, which may result in increased brokerage and other expenses or higher current realization of short-term capital gains, which are taxable at ordinary income rates, and a potentially larger current tax liability.

Performance Information

The bar chart below shows changes in the Explorer Fund's annual returns for the Institutional Class shares (the Class with the longest period of annual returns) from year to year. The performance of Investor Class shares will differ due to differences in expenses.

The table below shows how the Explorer Fund's average annual returns for the periods indicated compare over time to those of a broad-based securities market index, the Morningstar® US Market IndexSM (TR), and the Morningstar® US Small Cap Market IndexSM (TR), which is the Explorer Fund's secondary index. The table also presents the impact of taxes on the Explorer Fund's Institutional Class shares.

This information provides some indication of the risks of investing in the Explorer Fund. Past performance of the Explorer Fund is not necessarily an indication of how it will perform in the future. Updated performance information is available by calling toll-free 800-673-0550.

Institutional Class Year-by-Year Annual Returns as of December 31st

During the period shown, the highest quarterly return was 25.98% (quarter ended June 30, 2020) and the lowest quarterly return was -32.91% (quarter ended March 31, 2020).

Year to date return as of June 30, 2026 was 17.36%.

Average Annual Returns for Periods Ended December 31, 2025

Return Before Taxes	One Year	Five Year	Ten Year	Since Inception ⁽¹⁾
Institutional Class Shares	9.21%	12.75%	12.54%	10.61%
Investor Class Shares	8.94%	12.52%	12.27%	10.52%
Return After Taxes – Institutional Class Shares				
Return After-Taxes on Distributions	7.89%	11.96%	11.70%	9.83%
Return After-Taxes on Distributions and Sale of Fund Shares	5.47%	9.84%	10.04%	8.40%
Morningstar® US Market Index SM (TR) (reflects no deduction for fees, expenses or taxes) ⁽²⁾	17.35%	13.29%	14.40%	13.24%
Morningstar® US Small Cap Market Index SM (TR) (reflects no deduction for fees, expenses or taxes)	12.20%	7.29%	9.74%	8.15%

⁽¹⁾ Institutional Class shares commenced operations on June 11, 2015 and Investor Class shares commenced operations on June 30, 2015.

⁽²⁾ In connection with adopted SEC regulations applicable to the Fund, the Morningstar® US Market IndexSM (TR) is the Fund's broad-based securities market index. The Fund will continue to show performance for the Morningstar® US Small Cap Market IndexSM (TR), the Fund's previous broad-based securities market index.

After-tax returns are shown for the Institutional Class shares only. After-tax returns for the Investor Class shares will vary. After-tax returns are calculated using the historical highest marginal individual U.S. federal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown. After-tax returns shown are not relevant to investors who hold their Explorer Fund shares through tax-deferred arrangements, such as 401(k) plans or IRAs, in which case you will generally be taxed upon withdrawal of monies from the tax-deferred arrangement. The index returns presented above assume reinvestment of all distributions and exclude the effect of taxes and fees (if expenses and taxes were deducted, the actual returns of the indices would be lower).

Investment Adviser

Applied Finance Advisors, LLC serves as the investment adviser to the Explorer Fund.

Portfolio Managers

Mr. Paul Blinn and Mr. Rafael Resendes have served as the Portfolio Managers to the Explorer Fund since the Explorer Fund's inception in April 2015.

For important information about purchase and sale of fund shares, tax information and financial intermediary compensation, please turn to the sections of this prospectus entitled "Purchase and Sale of Fund Shares", "Tax Information" and "Payments to Broker-Dealers and Other Financial Intermediaries".

FUND SUMMARY
Applied Finance Select Fund

Investment Objective

The investment objective of the Applied Finance Select Fund (the “Select Fund”) is long-term capital appreciation.

Fees and Expenses of the Select Fund

This table describes the fees and expenses that you may pay if you buy, hold and sell shares of the Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the tables and example below.**

	Investor Class	Institutional Class
Shareholder Fees <i>(fees paid directly from your investment)</i>	None	None
Annual Operating Expenses <i>(expenses that you pay each year as a percentage of the value of your investment)</i>		
Management Fees	0.90%	0.90%
Distribution (12b-1) and Service Fees	0.25%	None
Other Expenses:		
Shareholder Services Plan	0.16%	0.08%
Other Expenses	0.12%	0.12%
Total Other Expenses	0.28%	0.20%
Total Annual Fund Operating Expenses	1.43	1.10%
Less Fee Waivers and/or Expense Reimbursements ⁽¹⁾	(0.43)%	(0.35)%
Total Annual Fund Operating Expenses After Fee Waivers and/or Expense Reimbursements ⁽²⁾	1.00%	0.75%

⁽¹⁾ The Adviser has entered into a written expense limitation agreement under which it has agreed to limit the total expenses of the Select Fund (exclusive of interest, expenses incurred under a plan of distribution adopted pursuant to the Rule 12b-1 under the 1940 Act, taxes, acquired fund fees and expenses, brokerage commissions, dividend expenses on short sales, and other extraordinary expenses not incurred in the ordinary course of business) to an annual rate of 0.75% of the daily net assets of the Select Fund. Each waiver and/or reimbursement of an expense by the Adviser is subject to repayment by the Select Fund within thirty-six months following the date such waiver and/or reimbursement was made, provided that the Select Fund can make the repayment without exceeding the expense limitation in place at the time of the waiver or reimbursement and at the time the waiver or reimbursement is recouped. This expense limitation agreement may not be terminated prior to September 1, 2027 unless mutually agreed to in writing by the parties.

Example:

The following example is intended to help you compare the cost of investing in the Select Fund with the cost of investing in other mutual funds. The example assumes that you invest \$10,000 in the Select Fund for the time periods indicated and then redeem all your shares at the end of those periods. The example also assumes that your investment has a 5% return each year, and that the Select Fund’s operating expenses remain the same. The effect of the Adviser’s agreement to waive fees and/or reimburse expenses is only reflected in the first year of each example shown below. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

Share class	1 Year	3 Years	5 Years	10 Years
Investor Class	\$102	\$410	\$741	\$1,676
Institutional Class	\$77	\$315	\$572	\$1,309

For both share classes, your expenses would be the same as in the table above if you did not redeem your shares at the end of each period.

Portfolio Turnover

The Select Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in Total Annual Fund Operating Expenses or in the example, affect the Select Fund’s performance. During the most recent fiscal year ended April 30, 2026, the Select Fund’s portfolio turnover rate was 20.13% of the average value of its portfolio.

Principal Investment Strategies

The Select Fund invests primarily in the equity securities of U.S. companies whose market capitalizations are \$3 billion or more, measured at the time of purchase.

Equity securities in which the Select Fund may invest include common and preferred stocks, rights and warrants, and securities convertible into equity securities.

The Select Fund may also invest in the securities of other investment companies including ETFs.

In choosing investments, the Adviser employs a proprietary stock selection model that ranks stocks according to fundamental criteria that the Adviser believes are indicative of company strength and superior risk/return profile. These criteria may include intrinsic value, management quality, leverage and free cash flow, earnings quality, return on assets, return on equity and return on capital. The Select Fund will normally invest across a majority of economic sectors, although it may at times focus its investments in certain sectors.

The Select Fund will normally hold between 35 to 65 securities in its portfolio.

The Adviser will typically sell a company from the Select Fund’s portfolio when indicated by the proprietary stock selection model described above or when the Adviser elects to take a temporary defensive position.

From time to time, the Adviser may take temporary defensive positions, which are inconsistent with the Select Fund’s principal investment strategies, in attempting to respond to adverse market, economic, political, or other conditions. For example, the Select Fund may hold all or a portion of its assets in money market instruments, including cash, cash equivalents, U.S. government securities, other investment grade fixed income securities, certificates of deposit, bankers acceptances, commercial paper, money market funds and repurchase agreements. While the Select Fund is in a defensive position, the opportunity to achieve its investment objective will be limited.

Principal Risks

Risk is inherent in all investing. A summary description of certain principal risks of investing in the Select Fund is mentioned below. Before you decide whether to invest in the Select Fund, carefully consider these risk factors and special considerations associated with investing in the Select Fund, which may cause you to lose part or all your investment in the Select Fund. There can be no assurance that the Select Fund will achieve its investment objective.

Equity Securities Risk. Since the Select Fund invests in equity securities, it is subject to the risk that stock prices will fall over short or extended periods of time. Historically, the equity markets have moved in cycles, and the value of the Select Fund’s equity securities may fluctuate from day to day. Individual companies may report poor results or be negatively affected by industry and/or economic trends and developments. The prices of securities issued by such companies may suffer a decline in response. These factors contribute to price volatility, which is a principal risk of investing in the Select Fund.

Market Risk. The value of securities in the Select Fund's portfolio will fluctuate and, as a result, the Select Fund's share price may decline suddenly or over a sustained period. The equity securities purchased by the Select Fund may involve large price swings and potential for loss.

Management Risk. The strategies used by the Adviser may fail to produce the intended result.

Large Cap Risk. Larger, more established companies may be unable to attain the high growth rates of successful, smaller companies during periods of economic expansion.

Risks of Investment Selection and Asset Allocation. The Select Fund's investment success depends on the skill of the Adviser in evaluating, selecting and monitoring the portfolio assets. If the Adviser's conclusions about growth rates or securities values are incorrect, the Select Fund may not perform as anticipated.

Sector Risk. Sector risk is the possibility that securities within the same group of industries will decline in price due to sector-specific market or economic developments. If the Fund invests more heavily in a sector, the value of its shares may be especially sensitive to factors and economic risks that specifically affect that sector.

Risk of Other Equity Securities Other equity securities in which the Fund may invest include convertible securities, preferred securities, rights and warrants.

Convertible Securities. Convertible securities are subject to the risks and price fluctuations of the underlying stock. They may be subject to the risk that the issuer will not be able to pay interest or dividends when due and their market value may change based on changes in the issuer's credit rating or the market's perception of the issuer's creditworthiness. Some convertible preferred stocks have a conversion or call feature that allows the issuer to redeem the stock before the conversion date, which could diminish the potential for capital appreciation on the investment.

Preferred Securities. The fixed dividend rate of preferred stocks may cause their prices to behave more like those of debt securities. If interest rates rise, the value of preferred stock having a fixed dividend rate tends to fall. Preferred stock generally ranks behind debt securities in claims for dividends and assets of the issuer in a liquidation or bankruptcy.

Rights and Warrants. The price of a warrant does not necessarily move parallel to the price of the underlying security and is generally more volatile than that of the underlying security. Rights are similar to warrants, but normally have a shorter duration. The market for rights or warrants may be very limited and it may be difficult to sell them promptly at an acceptable price. Rights and warrants have no voting rights, receive no dividends and have no rights with respect to the assets of the issuer.

Investment Company Securities Risk. When the Select Fund invests in other investment companies, including ETFs, it indirectly bears its proportionate share of fees and expenses of the other investment company, which results in higher Fund expenses. The Select Fund may be affected by losses of the other investment companies and the level of risk arising from their investment practices.

ETF Risk. ETFs generally are investment companies whose shares represent an interest in a portfolio of securities. Some ETFs are designed to track various market indexes. Because the Select Fund may invest in ETFs, it is subject to additional risks that do not apply to conventional mutual funds, including the risks that the market price of an ETF's shares may trade at a discount to its NAV, an active secondary market may not develop or be maintained, or trading may be halted by the exchange in which they trade, which may impact the Select Fund's ability to sell its shares.

Performance Information

The bar chart below shows changes in the Select Fund's annual returns for the Investor Class shares (the Class with the longest period of annual returns) from year to year. The performance of Institutional Class shares will differ due to differences in expenses.

The table below shows how the Select Fund’s average annual returns for the periods indicated compare over time to those of a broad-based securities market index, the Morningstar® US Market IndexSM (TR), and the Morningstar® US Large-Mid Value Market IndexSM (TR), which is the Select Fund’s secondary index. The table also presents the impact of taxes on the Select Fund’s Investor Class shares.

This information provides some indication of the risks of investing in the Select Fund. Past performance of the Select Fund is not necessarily an indication of how it will perform in the future. Updated performance information is available by calling toll-free 800-673-0550.

Investor Class Year-by-Year Annual Returns as of December 31st

During the period shown, the highest quarterly return was 19.81% (quarter ended June 30, 2020) and the lowest quarterly return was -23.87% (quarter ended March 31, 2020).

Year to date return as of June 30, 2026 was 12.85%.

Average Annual Returns for Periods Ended December 31, 2025

Return Before Taxes	One Year	Five Year	Since Inception ⁽¹⁾
Investor Class Shares	13.10%	10.41%	12.05%
Institutional Class Shares	13.36%	10.67%	12.29%
Return After Taxes – Investor Class Shares			
Return After-Taxes on Distributions	11.45%	9.48%	11.26%
Return After-Taxes on Distributions and Sale of Fund Shares	7.76%	7.86%	9.57%
Morningstar® US Market Index SM (TR) (reflects no deduction for fees, expenses or taxes) ⁽²⁾	17.35%	13.29%	14.52%
Morningstar® US Large-Mid Value Market Index SM (TR) (reflects no deduction for fees, expenses or taxes)	17.67%	13.01%	10.39%

⁽¹⁾ Investor Class shares commenced operations on February 1, 2017 and Institutional Class shares commenced operations on February 3, 2017.

⁽²⁾ In connection with adopted SEC regulations applicable to the Fund, the Morningstar® US Market IndexSM (TR) is the Fund's broad-based securities market index. The Fund will continue to show performance for the Morningstar® US Large-Mid Value Market IndexSM (TR), the Fund's previous broad-based securities market index.

After-tax returns are shown for the Investor Class shares only. After-tax returns for the Institutional Class shares will vary. After-tax returns are calculated using the historical highest marginal individual U.S. federal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown. After-tax returns shown are not relevant to investors who hold their Select Fund shares through tax-deferred arrangements, such as 401(k) plans or IRAs, in which case you will generally be taxed upon withdrawal of monies from the tax-deferred arrangement. The index returns presented above assume reinvestment of all distributions and exclude the effect of taxes and fees (if expenses and taxes were deducted, the actual returns of the indices would be lower).

Investment Adviser

Applied Finance Advisors, LLC serves as the investment adviser to the Select Fund.

Portfolio Managers

Mr. Paul Blinn and Mr. Rafael Resendes have served as the Portfolio Managers to the Select Fund since the Select Fund's inception in June 2016.

For important information about purchase and sale of fund shares, tax information and financial intermediary compensation, please turn to the sections of this prospectus entitled "Purchase and Sale of Fund Shares", "Tax Information" and "Payments to Broker-Dealers and Other Financial Intermediaries".

GENERAL SUMMARY INFORMATION

Purchase and Sale of Fund Shares

You may purchase, redeem or exchange shares of the Funds on any business day, which is any day the New York Stock Exchange is open for business. You may purchase, redeem or exchange shares of the Funds either through a financial adviser or directly from the Funds. The minimum initial purchase or exchange into the Investor shares of each Fund is \$1,000. Subsequent investments must be in amounts of \$100 or more for Investor Class shares. The minimum initial purchase or exchange into the Institutional shares of each Fund is \$10,000. Subsequent investments in Institutional shares must be in amounts of \$100 or more. The Funds may waive minimums for purchases or exchanges through employer-sponsored retirement plans.

Tax Information

The Funds intend to make distributions that may be taxed as ordinary income or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k), IRA or 529 college saving plan, in which case withdrawals from such plans or arrangements generally will be taxed.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the Funds through a broker-dealer or other financial intermediary (such as a bank), the Funds and their distributor may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other financial intermediary and your salesperson to recommend the Funds over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

ADDITIONAL INFORMATION ABOUT THE FUNDS' INVESTMENTS

This prospectus describes the Funds' principal investment strategies, and the Funds will normally invest in the types of investments described in this prospectus. In addition to the investments described in this prospectus, the Funds also may use other strategies and engage in other investment practices that are not part of their principal investment strategies. These investments and strategies, as well as those described in this prospectus, are described in detail in the Funds' Statement of Additional Information ("SAI") (for information on how to obtain a copy of the SAI, see the back cover of this prospectus). Of course, there is no guarantee that the Funds will achieve their respective investment objective.

The Dividend Fund, the Explorer Fund and the Select Fund may each be referred to generally throughout this document as a "Fund" or collectively, as the "Funds."

The investment objective of the Dividend Fund, the Explorer Fund and the Select Fund is long-term capital appreciation. Each Fund's investment objective may be changed by the Board of Trustees without shareholder approval. Shareholders will be given at least 60 days advance notice if a Fund decides to change its investment objective or strategy.

Applied Finance Dividend Fund

The Dividend Fund will, under normal conditions, invest at least 80% of its net assets (including the amount of borrowing for investment purposes) in dividend-paying common and preferred stock of companies. This investment policy may be changed without shareholder approval upon at least 60 days' prior written notice to the Fund's shareholders. Generally, the companies in which the Dividend Fund will invest will have market capitalizations of \$3 billion or more, measured at the time of purchase.

The Adviser selects large cap dividend paying equity securities that it believes offer superior return potential considering the following factors:

- A company that has a history of paying dividends;
- Attractive market price relative to intrinsic value;
- Improving trends in a company's economic performance; and

- A company's effective pursuit of wealth-creating strategies.

The Adviser considers any firm that has paid a dividend in the last three years as having a history of paying dividends. However, at the time of purchase, a stock must have paid a dividend within the past four quarters. The Adviser uses the information described above to construct groups of stocks it feels are worthy of inclusion in the portfolio. The Adviser then selects stocks to add to the portfolio which it feels provide the best long-term return potential relative to the Adviser's perceived risks to the portfolio.

The Dividend Fund seeks to diversify its investments across a broad spectrum of economic sectors to reduce portfolio volatility and investment risk without sacrificing potential returns. In selecting securities within a particular economic sector, the Adviser's goal is to identify companies that it believes have the potential for superior performance within each sector. The Dividend Fund may, to a limited extent, invest in derivatives such as call options to amplify returns and to manage risk.

Equity securities in which the Dividend Fund or underlying funds may invest include common stocks, as well as securities convertible into common stocks, preferred stocks, and other investment companies (including ETFs) that invest primarily in equity securities.

The Dividend Fund typically sells a portfolio company when the company's stock price exceeds the Adviser's estimate of the company's fundamental value and/or there are other companies that the Adviser believes offer greater appreciation potential. When the Adviser deems that change will benefit the Dividend Fund, portfolio turnover will not be a limiting factor.

The Dividend Fund may invest on a global basis to take advantage of investment opportunities both within the United States and other countries. The Dividend Fund may buy foreign securities directly in their principal markets or indirectly through the use of depository receipts.

Applied Finance Explorer Fund

The Explorer Fund invests primarily in the equity securities of small and middle capitalization companies with market capitalizations of less than \$5 billion, measured at the time of purchase.

The Adviser selects equity securities that it believes offer superior return potential considering the following factors:

- Attractive market price relative to intrinsic value;
- Improving trends in a company's economic performance; and
- A company's effective pursuit of wealth-creating strategies.

The Adviser uses the information described above to construct groups of stocks it feels are worthy of inclusion in the portfolio. The Adviser then selects stocks to add to the portfolio which it feels provide the best long-term return potential relative to the Adviser's perceived risks to the portfolio.

The Explorer Fund seeks to diversify its investments across a broad spectrum of economic sectors to reduce portfolio volatility and investment risk without sacrificing potential returns. In selecting securities within a particular sector, the Adviser's goal is to identify companies that it believes have the potential for superior performance within each sector.

The Explorer Fund may also invest in other investment companies, including ETFs. ETFs, generally, are investment companies that seek to track the performance of a particular market index. These investment companies invest in securities that are consistent with the Explorer Fund's investment objective and strategies. By investing in other investment companies, the Explorer Fund indirectly pays a portion of the expenses and brokerage costs of these companies as well as its own expenses. Also, federal securities laws impose limits on such investments, which may affect the ability of the Fund to purchase or sell these shares. Securities of other investment companies will be acquired by the Fund within the limits established by the 1940 Act.

The Adviser will typically sell a company from the Explorer Fund's portfolio when the company's stock price exceeds the Adviser's estimate of the company's fundamental value and/or there are other companies that the Adviser believes offer greater investment potential. When the Adviser deems that change will benefit the Explorer Fund, the portfolio turnover of the Explorer Fund will not be a limiting factor.

Applied Finance Select Fund

The Select Fund invests primarily in the equity securities of U.S. companies whose market capitalizations are \$3 billion or more, measured at the time of purchase.

Equity securities in which the Select Fund may invest include common and preferred stocks, rights and warrants, and securities convertible into equity securities.

In choosing investments, the Adviser employs a proprietary stock selection model that ranks stocks according to fundamental criteria that the Adviser believes are indicative of company strength and superior risk/return profile. These criteria may include intrinsic value, management quality, leverage and free cash flow, earnings quality, return on assets, return on equity and return on capital.

The Adviser selects equity securities that it believes offer superior return potential considering the following factors:

- Attractive market price relative to intrinsic value;
- Improving trends in a company's economic performance; and
- A company's effective pursuit of wealth-creating strategies.

The Adviser uses the information described above to construct groups of stocks it feels are worthy of inclusion in the portfolio. The Adviser then selects stocks to add to the portfolio which it feels provide the best long-term return potential relative to the Adviser's perceived risks to the portfolio.

The Select Fund will normally invest across a majority of economic sectors.

The Select Fund will normally hold between 35 to 65 securities in its portfolio.

The Adviser will typically sell a company from the Select Fund's portfolio when indicated by the stock selection model or when the Adviser elects to take a temporary defensive position.

ADDITIONAL INFORMATION ABOUT RISK

The Funds' principal risks are mentioned below. Before you decide whether to invest in a Fund, carefully consider these risk factors and special considerations associated with investing in a Fund, which may cause you to lose money.

ALL FUNDS

Risk of Equity Securities. Since the Funds purchase equity securities, they are subject to the risk that stock prices will fall over short or extended periods of time. Historically, the equity markets have moved in cycles, and the value of a Fund's equity securities may fluctuate drastically from day to day. Individual companies may report poor results or be negatively affected by industry and/or economic trends and developments. The prices of securities issued by such companies may suffer a decline in response. These factors contribute to price volatility, which is a principal risk of investing in a Fund. Because stock prices tend to fluctuate, the value of your investment in a Fund may increase or decrease.

Market Risk. The Funds are subject to market risk. Market risk is the possibility that, over short or long periods, stock prices will decline. Because stock prices tend to fluctuate, the value of your investment in a Fund may increase or decrease.

Management Risk. The skill and judgment of the Adviser in selecting investments will play a significant role in a Fund's ability to achieve its objective.

Risks of Investment Selection and Asset Allocation. A Fund's investment success depends on the skill of the Adviser in evaluating, selecting and monitoring the portfolio assets. If the Adviser's conclusions about growth rates or securities values are incorrect, a Fund may not perform as anticipated.

Investment Company Securities Risk. When a Fund invests in another investment company such as a mutual fund or exchange-traded fund, the Fund indirectly will bear its proportionate share of any fees and expenses payable directly by that investment company. Therefore, the Fund will incur higher expenses, many of which may be duplicative. In addition, the Fund may be affected by losses of these investment companies and the level of risk arising from their investment practices (such as the use of leverage by the funds). The Fund has no control over the investments and related risks taken by investment companies in which it invests.

ETF Risk. ETFs generally are investment companies whose shares represent an interest in a portfolio of securities. Some ETFs are designed to track various market indexes. Because a Fund may invest in ETFs, it is subject to additional risks that do not apply to conventional mutual funds, including the risks that the market price of an ETF's shares may trade at a discount to its NAV, an active secondary market may not develop or be maintained, or trading may be halted by the exchange in which they trade, which may impact the Fund's ability to sell its shares.

Additionally, an active market may not develop for the ETF's shares, the ETF may employ a strategy that utilizes high leverage ratios, and trading of an ETF's shares could be halted under certain circumstances. To the extent that the Fund invests in inverse or leveraged ETFs, the value of the Fund's investment will decrease when the index underlying the ETF's benchmark rises, a result that is the opposite from traditional equity or bond funds. The NAV and market price of leveraged or inverse ETFs are usually more volatile than the value of the tracked index or of other ETFs that do not use leverage. Inverse and leveraged ETFs use investment techniques and financial instruments that may be considered aggressive, including the use of derivative transactions and short selling techniques. To the extent that the Fund invests in ETFs that invest in commodities, which are real assets such as oil, agriculture, livestock, industrial metals, and precious metals such as gold or silver, the Fund will be subject to additional risks. The values of commodity-based ETFs are highly dependent on the prices of the related commodity and the demand and supply of these commodities may fluctuate widely. Commodity ETFs may use derivatives, which exposes them to further risks, including counterparty risk (i.e., the risk that the institution on the other side of the trade will default).

Risks of Other Equity Securities. Other equity securities in which the Funds may invest include convertible securities, preferred securities, rights and warrants.

Convertible Securities. Convertible securities are securities that are convertible into or exchangeable for common or preferred stock. The values of convertible securities may be affected by changes in interest rates, the creditworthiness of their issuer, and the ability of the issuer to repay principal and to make interest payments. A convertible security tends to perform more like a stock when the underlying stock price is high and more like a debt security when the underlying stock price is low. A convertible security is not as sensitive to interest rate changes as a similar non-convertible debt security and generally has less potential for gain or loss than the underlying stock. Most convertible securities are subject to the risks and price fluctuations of the underlying stock. They may be subject to the risk that the issuer will not be able to pay interest or dividends when due and their market value may change based on changes in the issuer's credit rating or the market's perception of the issuer's creditworthiness. Some convertible preferred stocks have a conversion or call feature that allows the issuer to redeem the stock before the conversion date, which could diminish the potential for capital appreciation on the investment.

Preferred Securities. Preferred stock represents an equity interest in a company that generally entitles the holder to receive, in preference to the holders of other stocks such as common stocks, dividends and a fixed share of the proceeds resulting from a liquidation of the company. Preferred stocks may pay fixed or adjustable rates of return. The market value of preferred stock is subject to issuer-specific and market risks applicable generally to equity securities and is sensitive to changes in the issuer's creditworthiness, the ability of the issuer to make payments on the preferred stock and changes in interest rates, typically declining in value if interest rates rise. In addition, a company's preferred stock

generally pays dividends only after the company makes required payments to holders of its bonds and other debt. Therefore, the value of preferred stock will usually react more strongly than bonds and other debt to actual or perceived changes in the company's financial condition or prospects.

Rights and Warrants. The price of a warrant does not necessarily move parallel to the price of the underlying security and is generally more volatile than that of the underlying security. Rights are similar to warrants, but normally have a shorter duration. The market for rights or warrants may be very limited and it may be difficult to sell them promptly at an acceptable price. Rights and warrants have no voting rights, receive no dividends and have no rights with respect to the assets of the issuer.

Temporary Defensive Positions. From time to time, each Fund may take temporary defensive positions that are inconsistent with their respective principal investment strategies, in attempting to respond to adverse market, economic, political or other conditions. For example, a Fund may hold up to 100% of its assets in cash, short-term U.S. government securities, other investment companies including money market funds and exchange-traded funds, investment grade fixed income securities, or repurchase agreements. To the extent consistent with the Fund's principal strategies as described above, a Fund may also invest in such instruments at any time to maintain liquidity or pending selection of investments in accordance with its investment strategies. As a result of engaging in these temporary measures, the Funds may not achieve their respective investment objectives.

ADDITIONAL RISK APPLICABLE TO THE DIVIDEND FUND

Derivative Investment Risk - Options. The Dividend Fund's use of options may involve other risks than those associated with investing directly in the underlying securities or currencies. Derivatives, such as options, involve risks of improper valuation and ambiguous documentation and the risk that changes in the value of the derivative may not correlate perfectly with the underlying security. The Dividend Fund will realize a gain or loss upon the expiration or closing of the option contract. The risk in writing (selling) a call option is that the Dividend Fund gives up the opportunity for profit if the market price of the security increases and the option is exercised. The risk in buying an option is that the Dividend Fund pays a premium whether or not the option is exercised.

Dividend Payment Risk. The Dividend Fund will normally receive income from dividends that are paid by issuers of the Dividend Fund's investments. The amount of the dividend payments may vary and depends on performance and decisions of the issuer. Poor performance by the issuer or other factors may cause the issuer to lower or eliminate dividend payments to investors, including the Dividend Fund. Additionally, these types of securities may fall out of favor with investors and underperform the broader market. Depending upon market conditions, dividend-paying securities that meet the Dividend Fund's investment criteria may not be widely available or may be highly concentrated in only a few market sectors.

Depository Receipts. The Dividend Fund may invest indirectly in securities through sponsored or unsponsored American Depositary Receipts ("ADRs"), European Depositary Receipts ("EDRs") and other types of depository receipts (collectively "Depository Receipts"), to the extent such Depository Receipts become available. ADRs are typically issued by a U.S. bank or trust company and represent ownership of underlying foreign securities. EDRs and other types of depository receipts are typically issued by foreign banks or trust companies, although they also may be issued by U.S. banks or trust companies, and represent ownership of underlying securities issued by either a foreign or a United States corporation. Depository Receipts may not necessarily be denominated in the same currency as the underlying securities into which they may be converted. For purposes of the Fund's investment policies, investments in Depository Receipts will be deemed to be investments in the underlying securities. In addition to the risks of foreign investments applicable to the underlying securities, unsponsored Depository Receipts may also be subject to the risks that the foreign issuer may not be obligated to cooperate with the U.S. bank, may not provide additional financial and other information to the bank or the investor, or that such information in the U.S. market may not be current.

Foreign Securities Risk. Investing in securities of foreign companies and countries involves certain considerations and risks that are not typically associated with investing in U.S. government securities and securities of domestic companies. There may be less publicly available information about a foreign issuer than a domestic one, and foreign companies are not generally subject to uniform accounting, auditing and financial standards and requirements comparable to those

applicable to U.S. companies. There may also be less government supervision and regulation of foreign securities exchanges, brokers and listed companies than exists in the United States. Interest and dividends paid by foreign issuers may be subject to withholding and other foreign taxes, which may decrease the net return on such investments as compared to dividends and interest paid to the Fund by domestic companies or the U.S. government. There may be the possibility of expropriations, seizure or nationalization of foreign deposits, confiscatory taxation, political, economic or social instability or diplomatic developments that could affect assets of the Fund held in foreign countries. The establishment of exchange controls or other foreign governmental laws or restrictions could adversely affect the payment of obligations. In addition, investing in foreign securities will generally result in higher commissions than investing in similar domestic securities.

ADDITIONAL RISKS APPLICABLE TO THE DIVIDEND AND SELECT FUNDS

Large Cap Risk. Larger, more established companies may be unable to attain the high growth rates of successful, smaller companies during periods of economic expansion.

ADDITIONAL RISKS APPLICABLE TO THE EXPLORER AND DIVIDEND FUNDS

Small and Middle Cap Risk. Investing in the securities of smaller companies generally involves greater risk than investing in larger, more established companies. Although investing in securities of smaller companies offers potential above-average returns if the companies are successful, the risk exists that the companies will not succeed and the prices of the companies' shares could significantly decline in value. The earnings and prospects of smaller companies are more volatile than larger companies, and smaller companies may experience higher failure rates than do larger companies. The trading volume of securities of smaller companies is normally less than that of larger companies and, therefore, may disproportionately affect their market price, tending to make prices fall more in response to selling pressure than is the case with larger companies. Smaller companies may also have limited markets, product lines, or financial resources, and may lack management experience.

Sector Risk. Sector risk is the possibility that securities within the same group of industries will decline in price due to sector-specific market or economic developments. If a Fund invests more heavily in a sector, the value of its shares may be especially sensitive to factors and economic risks that specifically affect that sector. As a result, a Fund's share price may fluctuate more widely than the value of shares of a mutual fund that invests in a broader range of industries. Additionally, some sectors could be subject to greater government regulation than other sectors. Therefore, changes in regulatory policies for those sectors may have a material effect on the value of securities issued by companies in those sectors. The sectors in which a Fund may invest more heavily will vary.

Dividend Payment Risk. The Funds will normally receive income from dividends that are paid by issuers of the Funds' investments. The amount of the dividend payments may vary and depends on performance and decisions of the issuer. Poor performance by the issuer or other factors may cause the issuer to lower or eliminate dividend payments to investors, including the Funds. Additionally, these types of securities may fall out of favor with investors and underperform the broader market. Depending upon market conditions, dividend-paying securities that meet the Funds' investment criteria may not be widely available or may be highly concentrated in only a few market sectors.

ADDITIONAL RISKS APPLICABLE TO THE EXPLORER FUND

Portfolio Turnover Risk. The Fund may, at times, have a portfolio turnover rate that is higher than other stock funds. A high rate of portfolio turnover increases brokerage and other expenses, which are borne by the Fund and its shareholders. A high portfolio turnover rate can also result in higher current realization of capital gains and a potentially larger current tax liability.

THE FUNDS' USE OF MORNINGSTAR INDEXES

The Funds are not sponsored, endorsed, sold or promoted by Morningstar, Inc., or any of its affiliated companies (all such entities, collectively, "Morningstar Entities"). The Morningstar Entities make no representation or warranty, express or implied, to the owners of the Funds or any member of the public regarding the advisability of investing in equities generally or in the Funds in particular or the ability of the Morningstar Indexes to track general equities performance. The Morningstar Entities' only relationship to the Adviser is the licensing of certain service marks and service names of Morningstar and of the Morningstar Indexes, which is determined, composed and calculated by the Morningstar Entities without regard to the Adviser or the Funds. The Morningstar Entities have no obligation to take the needs of the Adviser or the shareholders of the Funds into consideration in determining, composing or calculating the Morningstar Indexes. The Morningstar Entities are not responsible for and has not participated in the determination of the prices and amount of the Funds or the timing of the issuance or sale of the Funds or in the determination or calculation of the equation by which the Funds are converted into cash. The Morningstar Entities have no obligation or liability in connection with the administration, marketing or trading of the Funds.

THE MORNINGSTAR ENTITIES DO NOT GUARANTEE THE ACCURACY AND/OR THE COMPLETENESS OF THE MORNINGSTAR INDEXES OR ANY DATA INCLUDED THEREIN AND THE MORNINGSTAR ENTITIES SHALL HAVE NO LIABILITY FOR ANY ERRORS, OMISSIONS, OR INTERRUPTIONS THEREIN. THE MORNINGSTAR ENTITIES MAKE NO WARRANTY, EXPRESS OR IMPLIED, AS TO RESULTS TO BE OBTAINED BY THE ADVISER, SHAREHOLDERS OF THE FUNDS, OR ANY OTHER PERSON OR ENTITY FROM THE USE OF THE MORNINGSTAR INDEXES OR ANY DATA INCLUDED THEREIN. THE MORNINGSTAR ENTITIES MAKE NO EXPRESS OR IMPLIED WARRANTIES, AND EXPRESSLY DISCLAIMS ALL WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR USE WITH RESPECT TO THE MORNINGSTAR INDEXES OR ANY DATA INCLUDED THEREIN. WITHOUT LIMITING ANY OF THE FOREGOING, IN NO EVENT SHALL THE MORNINGSTAR ENTITIES HAVE ANY LIABILITY FOR ANY SPECIAL, PUNITIVE, INDIRECT, OR CONSEQUENTIAL DAMAGES (INCLUDING LOST PROFITS), EVEN IF NOTIFIED OF THE POSSIBILITY OF SUCH DAMAGES.

PORTFOLIO HOLDINGS DISCLOSURE

A description of the policies and procedures employed by the Funds with respect to the disclosure of Fund portfolio holdings is available in the Funds' SAI. Complete holdings (as of the dates of such reports) are available in reports on Form N-PORT and Form N-CSR filed with the Securities and Exchange Commission (the "SEC").

MANAGEMENT

The Investment Adviser

Applied Finance Advisors, LLC (the "Adviser"), a Delaware limited liability corporation organized in Delaware, is the investment adviser to the Funds. The address of the principal office of the Adviser is 17806 IH 10, Suite 300, San Antonio, Texas 78257. As of June 30, 2026, the Adviser had approximately \$2.37 billion in assets under management.

Under the Advisory Agreements the monthly compensation paid to the Adviser is accrued daily at an annual rate of 0.90% of the Dividend Fund's and Select Fund's daily net assets and 1.14% of the Explorer Fund's daily net assets.

The Adviser has contractually agreed to reduce fees and reimburse expenses until September 1, 2026, to keep net operating expenses (exclusive of interest, fees incurred under a plan of distribution pursuant to Rule 12b-1 under the 1940 Act, taxes, acquired fund fees and expenses, brokerage commissions, dividend expenses on short sales, and other extraordinary expenditures not incurred in the ordinary course of business) from exceeding 0.95%, 0.83% and 0.75% of the Dividend, Explorer and Select Funds' daily net assets, respectively.

Each waiver or reimbursement of an expense by the Adviser is subject to repayment by the respective Fund within thirty-six months following the date such waiver and/or reimbursement was made, provided that the respective Fund is able to make the repayment without exceeding the expense limitation in place at the time of the waiver or reimbursement and at the time the waiver or reimbursement is recouped. During the fiscal year ended April 30, 2026,

the Adviser received a management fee (after waiver and reimbursement of Fund expenses) equal to 0.35% from the Dividend Fund, 0.62% from the Explorer Fund, and 0.54% from the Select Fund.

The Adviser, not the Funds, may pay certain financial intermediaries a fee for providing distribution related services and/or for performing certain administrative servicing functions for the Funds' shareholders to the extent these institutions can do so by applicable statute, rule or regulation. The Funds may from time to time purchase securities issued by financial intermediaries that provide such services; however, in selecting investments for the Funds, no preference will be shown for such securities.

A discussion regarding the basis for the Board's approval of the Funds' investment advisory agreements is available in the Funds' annual report to shareholders dated April 30, 2026.

The Portfolio Managers

Mr. Paul Blinn, portfolio manager, is jointly responsible for the day-to-day management of the Funds' portfolios, including stock selection, investment monitoring and trading. Mr. Blinn joined the Adviser as a founding member in 2006 and has served as principal of the Adviser since that time. Mr. Blinn has over 25 years of capital market experience. Mr. Blinn's background includes experience as an Executive Director at UBS, a global financial firm, and its predecessor entities from 1985 to 2000, as a Vice President of a leading option market maker, and a Senior Equity derivatives trader for a hedge fund from 2000 to 2005. Mr. Blinn graduated with honors from The University of Texas at Austin with a BBA in Finance.

Mr. Rafael Resendes, portfolio manager, is jointly responsible for the day-to-day management of the Funds' portfolios, including stock selection and investment monitoring. Mr. Resendes was a founding member of the Adviser in 2006 and has served as a principal of the Adviser since that time. Mr. Resendes was also a co-founder of The Applied Finance Group, Ltd. in 1995 and he has served as a principal of that entity since that time. Mr. Resendes has over 25 years of capital market experience and has spent the majority of those years in the areas of equity research and valuation. Mr. Resendes was an adjunct professor of finance at DePaul University in Chicago from 1998 to 1999. He graduated Phi Beta Kappa from The University of California, Berkeley with a BS in Finance and received his MBA from the University of Chicago.

The SAI provides additional information about the Portfolio Managers' compensation, other accounts managed and ownership of shares of the Funds.

HOW TO BUY SHARES

You may purchase shares of the Funds through financial intermediaries, such as fund supermarkets or through brokers or dealers who are authorized by Foreside Fund Services, LLC, a wholly owned subsidiary of Foreside Financial Group, LLC (d/b/a ACA Group) (the "Distributor"), the Funds' distributor, to offer shares of the Funds, and through advisers and consultants and other investment professionals (collectively "Financial Intermediaries"). You may request a copy of this prospectus by calling toll-free 800-673-0550. Financial Intermediaries who offer shares of the Funds may require the payment of fees from their individual clients, which may be different from those described in this prospectus. For example, Financial Intermediaries may charge transaction fees or set different minimum investment amounts. They may also have policies and procedures that are different from those contained in this prospectus. Investors should consult their Financial Intermediary regarding its procedures for purchasing and selling shares of the Funds as the policies and procedures may be different.

The price you pay for a share of a Fund is the NAV next determined upon receipt of your purchase request by Commonwealth Fund Services, Inc. (the "Transfer Agent") or an authorized financial intermediary. A Fund will be deemed to have received your purchase or redemption order when the authorized financial intermediary receives the order. Such financial intermediaries are authorized to designate other intermediaries to receive purchase and redemption orders on a Fund's behalf.

Certain Financial Intermediaries may have agreements with the Funds that allow them to enter confirmed purchase and redemption orders on behalf of clients and customers. Under this arrangement, the Financial Intermediary must send your payment to a Fund by the time the Fund prices its shares on the following business day.

The Funds are not responsible for ensuring that a Financial Intermediary carries out its obligations. You should look to the Financial Intermediary through whom you wish to invest for specific instructions on how to purchase or redeem shares of a Fund.

Share Class Alternatives. Two different classes of shares are currently offered through this prospectus: Investor Class shares charging a 0.25% 12b-1 fee and Institutional Shares not charging 12b-1 fees.

The different classes of shares represent investments in the same portfolio of securities, but the classes are subject to different expenses and may have different share prices and minimum investment requirements. When you buy shares be sure to specify the class of shares in which you choose to invest. Because each share class has a different combination of sales charges, expenses and other features, you should consult your financial advisor to determine which class best meets your financial objectives.

Minimum Investments. The minimum initial purchase or exchange into the Investor shares of each Fund is \$1,000. Subsequent investments must be in amounts of \$100 or more for Investor Class shares. The minimum initial purchase or exchange into the Institutional shares of each Fund is \$10,000. Subsequent investments in Institutional shares must be in amounts of \$100 or more. The Funds may waive minimums for purchases or exchanges through employer-sponsored retirement plans. The Trust may waive the minimum initial investment requirement for purchases made by trustees, officers and employees of the Trust. The Trust may also waive the minimum investment requirement for purchases by its affiliated entities and certain related advisory accounts and retirement accounts (such as IRAs). The Trust may also change or waive policies concerning minimum investment amounts at any time. The Funds retain the right to refuse to accept an order.

Small Account Balances. If the value of your account falls below the minimum account balance of \$1,000 a Fund may ask you to increase your balance. If the account value is still below the minimum balance after 60 days, a Fund may close your account and send you the proceeds. A Fund will not close your account if it falls below this amount solely as a result of Fund performance. Please check with your Financial Intermediary concerning required minimum account balances. You should note that should a Fund close your account that is not tax deferred, such as a 401(k) plan or IRA, such redemption of Fund shares would be subject to taxation. Please refer to the section entitled "Dividends, Distributions and Taxes" below.

Proper Form. Your order to buy shares is in proper form when your completed and signed account application and check or wire payment is received. Your written request to sell or exchange shares is in proper form when written instructions signed by all registered owners, with a signature guarantee if necessary, is received by the Fund.

Customer Identification Program. Federal regulations require that the Trust obtain certain personal information about you when opening a new account. As a result, the Trust must obtain the following information for each person that opens a new account:

- Name;
- Date of birth (for individuals);
- Residential or business street address (although post office boxes are still permitted for mailing); and
- Social security number, taxpayer identification number, or other identifying number.

You may also be asked for a copy of your driver's license, passport, or other identifying document in order to verify your identity. In addition, it may be necessary to verify your identity by cross referencing your identification information with a consumer report or other electronic database. Additional information may be required to open accounts for corporations and other entities.

After an account is opened, the Trust may restrict your ability to purchase additional shares until your identity is verified. The Trust also may close your account or take other appropriate action if it is unable to verify your identity within a reasonable time.

If your account is closed for this reason, your shares will be redeemed at the NAV next calculated after the account is closed.

Purchases By Mail. For initial purchases, the account application, which accompanies this prospectus, should be completed, signed and mailed to the Transfer Agent at 8730 Stony Point Parkway, Suite 205, Richmond, Virginia 23235, together with your check payable to the respective Fund. Please be sure to specify which class of shares in which you wish to invest. For subsequent purchases, include with your check the tear-off stub from a prior purchase confirmation, or otherwise identify the name(s) of the registered owner(s) and social security number(s).

Purchases by Wire. You may purchase shares by requesting your bank to transmit by wire directly to the Transfer Agent. To invest by wire, please call the Funds toll-free at 800-673-0550 or the Transfer Agent toll-free at 800-628-4077 to advise the Trust of your investment and to receive further instructions. Your bank may charge you a small fee for this service. Once you have arranged to purchase shares by wire, please complete and mail the account application promptly to the Transfer Agent. This account application is required to complete the Funds' records. You will not have access to your shares until the Funds' records are complete. Once your account is opened, you may make additional investments using the wire procedure described above. Be sure to include your name and account number in the wire instructions you provide your bank.

General. The Trust reserves the right, in its sole discretion, to withdraw all or any part of the offering of shares of a Fund when, in the judgment of the Funds' management, such withdrawal is in the best interest of the Funds. An order to purchase shares is not binding on, and may be rejected by, the Funds until it has been confirmed in writing by the Funds and payment has been received. The price you pay for a share of the Funds is the NAV next determined upon receipt by the Transfer Agent or financial intermediary.

Other Purchase Information. You may purchase and redeem Fund shares, or exchange shares of a Fund for those of another, by contacting any broker authorized by the Distributor to sell shares of the Funds, by contacting the Funds toll-free at 800-673-0550 or by contacting the Transfer Agent at 8730 Stony Point Parkway, Suite 205, Richmond, Virginia 23235 or by telephoning toll-free 800-628-4077. Brokers may charge transaction fees for the purchase or sale of the Funds' shares, depending on your arrangement with the broker.

HOW TO SELL SHARES

You may redeem your shares of the Funds at any time and in any amount by contacting your Financial Intermediary or by contacting the Fund by mail or telephone. For your protection, the Transfer Agent will not redeem your shares until it has received all information and documents necessary for your request to be considered in "proper form." The Transfer Agent will promptly notify you if your redemption request is not in proper form. The Transfer Agent cannot accept redemption requests which specify a particular date for redemption or which specify any special conditions.

The Funds' procedure is to redeem shares at the NAV next determined after the Transfer Agent or authorized financial intermediary receives the redemption request in proper form. Payment of redemption proceeds will be made promptly, as instructed by check, wire or automated clearing house (ACH) but no later than the seventh calendar day following the receipt of the request in proper form. The Funds may suspend the right to redeem shares for any period during which the NYSE is closed or the SEC determines that there is an emergency. In such circumstances, you may withdraw your redemption request or permit your request to be held for processing after the suspension is terminated.

The Funds typically expect to meet redemption requests through cash holdings or cash equivalents and anticipates using these types of holdings on a regular basis. The Funds typically expect to pay redemption proceeds for shares redeemed within the following days after receipt by the Transfer Agent of a redemption request in proper form: (i) for payment by check, the Funds typically expect to mail the check within two business days; and (ii) for payment by wire or ACH, the Funds typically expect to process the payment within two business days. Payment of redemption proceeds may take up

to 7 days as permitted under the 1940 Act. Under unusual circumstances as permitted by the SEC, the Funds may suspend the right of redemption or delay payment of redemption proceeds for more than 7 days. When shares are purchased by check or through ACH, the proceeds from the redemption of those shares will not be paid until the purchase check or ACH transfer has been converted to federal funds, which could take up to 15 calendar days.

To the extent cash holdings or cash equivalents are not available to meet redemption requests, the Funds will meet redemption requests by selling portfolio assets. In addition, if a Fund determines that it would be detrimental to the best interest of the Fund's remaining shareholders to make payment in cash, the Fund may pay redemption proceeds in whole or in part by a distribution-in-kind of readily marketable securities.

If you sell your shares through a securities dealer or investment professional, it is such person's responsibility to transmit the order to the Funds in a timely fashion. Any loss to you resulting from failure to do so must be settled between you and such person.

Delivery of the proceeds of a redemption of shares purchased and paid for by check shortly before the receipt of the redemption request may be delayed until the Transfer Agent has completed collection of the purchase check, which may take up to 15 days. Also, payment of the proceeds of a redemption request for an account for which purchases were made by wire may be delayed until a completed account application for the account is received to verify the identity of the person redeeming the shares and to eliminate the need for backup withholding.

Redemption By Mail. To redeem shares by mail, send a written request for redemption, signed by the registered owner(s) exactly as the account is registered, to: the name of the Fund, Attn: Redemptions, 8730 Stony Point Parkway, Suite 205, Richmond, Virginia 23235. Certain written requests to redeem shares may require signature guarantees. For example, signature guarantees may be required if you sell a large number of shares, if your address of record on the account application has been changed within the last 30 days, or if you ask that the proceeds be sent to a different person or address. Signature guarantees are used to help protect you and the Fund. You can obtain a signature guarantee from most banks or securities dealers, but not from a Notary Public. Please call the Transfer Agent toll-free at 800-628-4077 to learn if a signature guarantee is needed or to make sure that it is completed appropriately in order to avoid any processing delays. There is no charge to shareholders for redemptions by mail.

Redemption By Telephone. You may redeem your shares by telephone if you requested this service on your initial account application. If you request this service at a later date, you must send a written request along with a signature guarantee to the Transfer Agent. Once your telephone authorization is in effect, you may redeem shares by calling the Transfer Agent toll-free at 800-628-4077. There is no charge to shareholders for redemptions by telephone. If it should become difficult to reach the Transfer Agent by telephone during periods when market or economic conditions lead to an unusually large volume of telephone requests, a shareholder may send a redemption request by overnight mail to the Transfer Agent at 8730 Stony Point Parkway, Suite 205, Richmond, Virginia 23235.

Redemption By Wire. If you request that your redemption proceeds be wired to you, please call your bank for instructions prior to writing or calling the Transfer Agent. Be sure to include your name, Fund name, Fund account number, your account number at your bank and wire information from your bank in your request to redeem by wire.

The Funds will not be responsible for any losses resulting from unauthorized transactions (such as purchases, sales or exchanges) if they follow reasonable security procedures designed to verify the identity of the investor. You should verify the accuracy of your confirmation statements immediately after you receive them. There is no fee for redemptions by wire.

Redemption in Kind. The Funds typically expect to satisfy requests by using holdings of cash or cash equivalents or selling portfolio assets. On a less regular basis, and if the Adviser believes it is in the best interest of a Fund and its shareholders not to sell portfolio assets, a Fund may satisfy redemption requests by using short-term borrowing from the Fund's custodian to the extent such arrangements are in place with the custodian.

In addition to paying redemption proceeds in cash, the Funds reserve the right to make payment for a redemption in securities rather than cash, which is known as a "redemption in kind." While the Funds do not intend, under normal

circumstances, to redeem shares by payment in kind, it is possible that conditions may arise in the future which would, in the opinion of the Trustees, make it undesirable for the Funds to pay for all redemptions in cash. In such a case, the Trustees may authorize payment to be made in readily marketable portfolio securities of a Fund, either through the distribution of selected individual portfolio securities or a pro-rata distribution of all portfolio securities held by the Fund.

Securities delivered in payment of redemptions would be valued at the same value assigned to them in computing the respective Fund's NAV per share. Shareholders receiving them may incur brokerage costs when these securities are sold and will be subject to market risk until such securities are sold. An irrevocable election has been filed under Rule 18f-1 of the 1940 Act, wherein the Funds must pay redemptions in cash, rather than in kind, to any shareholder of record of a Fund who redeems during any 90-day period, the lesser of (a) \$250,000 or (b) 1% of a Fund's net assets at the beginning of such period. Redemption requests in excess of this limit may be satisfied in cash or in kind at the Funds' election. The Funds' methods of satisfying shareholder redemption requests will normally be used during both regular and stressed market conditions.

DIVIDENDS, DISTRIBUTIONS AND TAXES

Dividends and Capital Gain Distributions. Dividends from net investment income, if any, are declared and paid at least annually by the Funds. The Funds intend to distribute at least annually any net capital gains.

Dividends and distributions will automatically be reinvested in additional shares of the Funds, unless you elect to have the distributions paid to you in cash. There are no sales charges or transaction fees for reinvested dividends and distributions and all shares will be purchased at NAV. Shareholders will be subject to tax on all distributions (including dividends) whether paid to them in cash or reinvested in shares. If the investment in shares is made within an IRA or 401(k), all dividends and capital gain distributions must be reinvested.

Unless you are investing through a tax deferred arrangement, such as an IRA or 401(k), it is not to your advantage to buy shares of the Funds shortly before the next distribution, because doing so can cost you money in taxes. This is known as "buying a dividend". To avoid buying a dividend, check the Funds' distribution schedule before you invest.

Taxes. In general, Fund distributions are taxable to you as either ordinary income or capital gain. This is true whether you reinvest your distributions in additional shares of the Funds or receive them in cash. Any long-term capital gain the Funds distribute are taxable to you as long-term capital gain no matter how long you have owned your shares. Other Fund distributions (including distributions attributable to short-term capital gain of the Funds) generally will be taxable to you at ordinary income tax rates. After the close of the taxable year, you will receive a statement that shows the tax status of distributions you received for the previous year. Distributions declared in December but paid in January are taxable as if they were paid in December.

When you sell shares of the Funds, you may have a capital gain or loss. For tax purposes, an exchange of your shares of a Fund for shares of a different Fund of the Trust is the same as a sale. The individual tax rate on any gain from the sale or exchange of your shares depends, in part, on how long you have held your shares and your income for the year.

Fund distributions and gains from the sale or exchange of your shares will generally be subject to applicable U.S. state and local income tax. The one major exception to these tax principles is that distributions on, and sales exchanges and redemptions of, shares held in an IRA, 401(k), or other tax-deferred arrangement generally will not be currently taxable. Non-U.S. investors may be subject to U.S. federal income tax withholding and estate tax. You should consult with your own tax advisor about the U.S. federal, state, local or foreign tax consequences of your investment in the Funds.

By law, the Fund must backup withhold 24% of your taxable distributions and proceeds of a sale of shares if you fail to properly furnish the Fund with a correct taxpayer identification number, you have under-reported dividend or interest income, or you fail to properly certify to the Fund that you are not subject to such backup withholding.

Cost Basis Reporting. Mutual fund companies must report their shareholders' cost basis, gain/loss, and holding period to the IRS on the Funds' shareholders' Consolidated Form 1099s when shares are sold.

The Funds have chosen average cost as the standing (default) tax lot identification method for all shareholders. A tax lot identification method is the way the Funds will determine which specific shares are deemed to be sold when there are multiple purchases on different dates at differing prices, and the entire position is not sold at one time. The Funds' standing tax lot identification method is the method shares will be reported on your Consolidated Form 1099 if you do not select a different tax lot identification method. You may choose a method different than the Funds' standing method and will be able to do so at the time of your purchase or upon the sale of shares.

The Funds are responsible for maintaining accurate cost basis and tax lot information for tax reporting purposes for shares. The Funds and their service providers do not provide tax advice. You should consult independent sources, which may include a tax professional, with respect to any decisions you may make with respect to choosing a tax lot identification method given your particular situation.

NET ASSET VALUE

Each Fund's share price, called the NAV per share, is determined on each business day that the NYSE is open for trading, as of the close of business of the regular session of the NYSE (generally 4:00 p.m., Eastern time). NAV per share is computed by adding the total value of the Fund's investments and other assets attributable to the Fund's shares, subtracting any liabilities attributable to the applicable class and then dividing by the total number of the applicable classes' shares outstanding. Due to the fact that different expenses may be charged against shares of different classes of the Fund, the NAV of the different classes may vary.

Fund shares are bought or exchanged at the public offering price per share next determined after a request has been received in proper form (as defined below). The public offering price of the Funds' shares is equal to the NAV plus the applicable front-end sales charge, if any. Shares of the Fund held by you are sold or exchanged at the NAV per share next determined after a request has been received in proper form. Any request received in proper form before the Valuation Time, will be processed the same business day. Any request received in Proper Form after the Valuation Time, will be processed the next business day.

Proper Form. Your order to buy shares is in proper form when your completed and signed account application and check or wire payment is received by the Transfer Agent. Your written request to sell or exchange shares is in proper form when written instructions signed by all registered owners, with a signature guarantee if necessary, is received.

FAIR VALUE PRICING

The Funds' securities are valued at current market prices. Investments in securities traded on a principal exchange (U.S. or foreign) are valued at the last reported sales price on the exchange on which the securities are traded as of the close of business on the last day of the period or, lacking any sales, at the average of the bid and ask price on the valuation date. Investments in securities included in the NASDAQ National Market System are valued at the NASDAQ Official Closing Price. In cases where securities are traded on more than one exchange, the securities are valued on the exchange designated by or under the authority of the Funds' Board of Trustees. Short-term debt securities (less than 60 days to maturity) are valued at their fair market value using amortized cost. Securities traded in the over-the-counter market are valued at the last available sale price in the over-the-counter market prior to time of valuation. Securities for which market quotations are not readily available are valued on a consistent basis at fair value as determined in good faith by the Valuation Designee (as defined below). Depositary Receipts will be valued at the closing price of the instrument last determined prior to time of valuation unless the Funds are aware of a material change in value. Securities for which such a value cannot be readily determined will be valued at the closing price of the underlying security adjusted for the exchange rate. Temporary investments in U.S. dollar denominated short-term investments are valued at amortized cost, which approximates market value. Portfolio securities which are primarily traded on foreign exchanges are generally valued at the closing price on the exchange on which they are traded, and those values are then translated into U.S. dollars at the current exchange rate. Other assets for which market prices are not readily available are valued at their fair value as determined in good faith by the Funds' Adviser, under procedures set by the Board. The Board has appointed the Adviser as its designee (the "Valuation Designee") to be responsible for all fair value determinations for the Funds. Generally, trading in corporate bonds, U.S. government securities and money market

instruments is substantially completed each day at various times before the scheduled close of the NYSE. The value of these securities used in computing the NAV is determined as of such times so long as the Valuation Designee believes that these values reflect fair value at the time the Fund's NAV is determined.

The Trust has a policy that contemplates the use of fair value pricing to determine the NAV per share of the Funds when market prices are unavailable as well as under special circumstances, such as: (i) if the primary market for a portfolio security suspends or limits trading or price movements of the security; and (ii) when an event occurs after the close of the exchange on which a portfolio security is principally traded that is likely to have changed the value of the security.

When the Trust uses fair value pricing to determine the NAV per share of the Funds, securities will not be priced on the basis of quotations from the primary market in which they are traded, but rather may be priced by another method that the Board believes accurately reflects fair value. Any method used will be approved by the Valuation Designee and results will be monitored to evaluate accuracy. The Trust's policy is intended to result in a calculation of the Funds' NAV that fairly reflects security values as of the time of pricing. However, fair values determined pursuant to the Trust's procedures may not accurately reflect the price that the Funds could obtain for a security if they were to dispose of that security as of the time of pricing.

FREQUENT PURCHASES AND REDEMPTIONS

Frequent purchases and redemptions ("Frequent Trading") of shares of the Funds may present a number of risks to other shareholders of the Funds. These risks may include, among other things, dilution in the value of shares of the Funds held by long-term shareholders, interference with the efficient management by the Adviser of the Funds' portfolio holdings, and increased brokerage and administration costs. Due to the potential of an overall adverse market, economic, political, or other conditions affecting the sale price of portfolio securities, the Funds could face untimely losses as a result of having to sell portfolio securities prematurely to meet redemptions. Current shareholders of the Funds may face unfavorable impacts as portfolio securities concentrated in certain sectors may be more volatile than investments across broader ranges of industries as sector-specific market or economic developments may make it more difficult to sell a significant amount of shares at favorable prices to meet redemptions. Frequent Trading may also increase portfolio turnover, which may result in increased capital gains taxes for shareholders of the Funds. These capital gains could include short-term capital gains taxed at ordinary income tax rates.

The Trustees have adopted a policy that is intended to identify and discourage Frequent Trading by shareholders of the Funds under which the Trust's Chief Compliance Officer and Transfer Agent will monitor Frequent Trading using various surveillance techniques. Under these policies and procedures, shareholders may not engage in more than four "round-trips" (a purchase and sale or an exchange in and then out of a Fund) within a rolling twelve-month period. Shareholders exceeding four round-trips will be investigated by the Funds and if, as a result of this monitoring, the Funds believe that a shareholder has engaged in frequent trading, it may, in its discretion, ask the shareholder to stop such activities or refuse to process purchases in the shareholder's accounts. The intent of the policies and procedures is not to inhibit legitimate strategies, such as asset allocation, dollar cost averaging or similar activities that may nonetheless result in Frequent Trading of Fund shares. To minimize harm to the Funds and their shareholders, the Funds reserves the right to reject any exchange or purchase of Fund shares with or without prior notice to the account holder. In the event the foregoing purchase and redemption patterns occur, it shall be the policy of the Trust that the shareholder's account and any other account with the Funds under the same taxpayer identification number shall be precluded from investing in the Funds (including investment that are part of an exchange transaction) for such time period as the Trust deems appropriate based on the facts and circumstances (including, without limitation, the dollar amount involved and whether the Investor has been precluded from investing in the Funds before); provided that such time period shall be at least 30 calendar days after the last redemption transaction. The above policies shall not apply if the Trust determines that a purchase and redemption pattern is not a Frequent Trading pattern or is the result of inadvertent trading errors.

These policies and procedures will be applied uniformly to all shareholders and, subject to certain permissible exceptions as described above, the Funds will not accommodate abusive Frequent Trading. The policies also apply to any account, whether an individual account or accounts with financial intermediaries such as investment advisers, broker dealers or retirement plan administrators, commonly called omnibus accounts, where the intermediary holds Fund shares for a number of its customers in one account. Omnibus account arrangements permit multiple investors to aggregate their

respective share ownership positions and purchase, redeem and exchange Fund shares without the identity of the particular shareholder(s) being known to the Funds. Accordingly, the ability of the Funds to monitor and detect Frequent Trading activity through omnibus accounts may be more limited and there is no guarantee that the Funds will be able to identify shareholders who may be engaging in Frequent Trading through omnibus accounts or to curtail such trading. However, the Funds will establish information sharing agreements with intermediaries as required by Rule 22c-2 under the 1940 Act that require sharing of information about you and your account, and otherwise use reasonable efforts to work with intermediaries to identify excessive short-term trading in underlying accounts.

If the Funds identify that excessive short-term trading is taking place in a participant-directed employee benefit plan accounts, the Funds or its Adviser or Transfer Agent will contact the plan administrator, sponsor or trustee to request that action be taken to restrict such activity. However, the ability to do so may be constrained by regulatory restrictions or plan policies. In such circumstances, it is generally not the policy of the Funds to close the account of an entire plan due to the activity of a limited number of participants. However, the Funds will take such actions as deemed appropriate in light of all the facts and circumstances.

The Funds' policies provide for ongoing assessment of the effectiveness of current policies and surveillance tools, and the Trustees reserves the right to modify these or adopt additional policies and restrictions in the future. Shareholders should be aware, however, that any surveillance techniques currently employed by the Funds or other techniques that may be adopted in the future, may not be effective, particularly where the trading takes place through certain types of omnibus accounts. As noted above, if the Funds are unable to detect and deter trading abuses, the Funds' performance, and their long-term shareholders, may be harmed. In addition, shareholders may be harmed by the extra costs and portfolio management inefficiencies that result from Frequent Trading, even when the trading is not for abusive purposes.

GENERAL INFORMATION

Signature Guarantees. To help protect you and the Funds from fraud, signature guarantees are required for: (1) all redemptions ordered by mail if you require that the check be made payable to another person or that the check be mailed to an address other than the one indicated on the account registration; (2) all requests to transfer the registration of shares to another owner; and (3) all authorizations to establish or change telephone redemption service, other than through your initial account application. Signature guarantees may be required for certain other reasons. For example, a signature guarantee may be required if you sell a large number of shares or if your address of record on the account has been changed within the last thirty (30) days.

In the case of redemption by mail, signature guarantees must appear on either: (1) the written request for redemption; or (2) a separate instrument of assignment (usually referred to as a "stock power") specifying the total number of shares being redeemed. The Trust may waive these requirements in certain instances.

An original signature guarantee assures that a signature is genuine so that you are protected from unauthorized account transactions. Notarization is not an acceptable substitute. Acceptable guarantors only include participants in the Securities Transfer Agents Medallion Program (STAMP2000). Participants in STAMP2000 may include financial institutions such as banks, savings and loan associations, trust companies, credit unions, broker-dealers and member firms of a national securities exchange.

Automatic Investment Plan. Existing shareholders, who wish to make regular monthly investments in amounts of \$100 or more, may do so through the Automatic Investment Plan. Under the Automatic Investment Plan, your designated bank or other financial institution debits a pre-authorized amount from your account on or about the 15th day of each month and applies the amount to the purchase of Fund shares. To use this service, you must authorize the transfer of funds by completing the Automatic Investment Plan section of the account application and sending a blank voided check.

Exchange Privilege. To the extent the Adviser manages other funds in the Trust, you may exchange all or a portion of your shares in a Fund for shares of the same class of certain other funds of the Trust managed by the Adviser having different investment objectives, provided that the shares of the fund you are exchanging into are registered for sale in

your state of residence. An exchange is treated as a redemption and purchase and may result in realization of a gain or loss on the transaction. You won't pay a deferred sales charge on an exchange; however, when you sell the shares you acquire in an exchange, you will pay a deferred sales charge based on the date you bought the original shares you exchanged. As of the date of this prospectus, the Adviser manages four funds in the Trust.

Frequent purchases and redemptions ("Frequent Trading") (as discussed above) can adversely impact Fund performance and shareholders. Therefore, the Trust reserves the right to temporarily or permanently modify or terminate the Exchange Privilege. The Trust also reserves the right to refuse exchange requests by any person or group if, in the Trust's judgment, the Funds would be unable to invest the money effectively in accordance with their investment objectives and policies or would otherwise potentially be adversely affected. The Trust further reserves the right to restrict or refuse an exchange request if the Trust has received or anticipates simultaneous orders affecting significant portions of the Funds' assets or detects a pattern of exchange requests that coincides with a "market timing" strategy. Although the Trust will attempt to give you prior notice when reasonable to do so, the Trust may modify or terminate the Exchange Privilege at any time.

How to Transfer Shares. If you wish to transfer shares to another owner, send a written request to the Transfer Agent at 8730 Stony Point Parkway, Suite 205, Richmond, Virginia 23235. Your request should include: (i) the name of the Fund and existing account registration; (ii) signature(s) of the registered owner(s); (iii) the new account registration, address, taxpayer identification number and how dividends and capital gains are to be distributed; (iv) any stock certificates which have been issued for the shares being transferred; (v) signature guarantees (See "Signature Guarantees"); and (vi) any additional documents which are required for transfer by corporations, administrators, executors, trustees, guardians, etc. If you have any questions about transferring shares, call the Transfer Agent toll-free at 800-628-4077.

Account Statements and Shareholder Reports. Each time you purchase, redeem or transfer shares of the Funds, you will receive a written confirmation. You will also receive a year-end statement of your account if any dividends or capital gains have been distributed, and an annual and a semi-annual report.

Shareholder Communications. The Funds may eliminate duplicate mailings of portfolio materials to shareholders who reside at the same address, unless instructed to the contrary. Investors may request that the Funds send these documents to each shareholder individually by calling the Funds, toll-free, at 800- 673-0550.

General. The Funds will not be responsible for any losses from unauthorized transactions (such as purchases, sales or exchanges) if they follow reasonable security procedures designed to verify the identity of the investor. You should verify the accuracy of your confirmation statements immediately after you receive them.

DISTRIBUTION ARRANGEMENTS

The Funds are offered through financial supermarkets, advisers and consultants, financial planners, brokers, dealers and other investment professionals. Financial Intermediaries who offer shares may request fees from their individual clients. If you invest through a third party, the policies and fees may be different than those described in this prospectus. For example, third parties may charge transaction fees or set different minimum investment amounts.

Rule 12b-1 Fees. Each of the Funds has adopted a Distribution Plan with respect to Investor Class shares in accordance with Rule 12b-1 under the 1940 Act. Pursuant to each of the Distribution Plans, the Funds may finance certain activities or expenses that are primarily intended to result in the sale of each Fund's shares (this compensation is commonly referred to as "12b-1 fees"). The Distribution Plans provide that the Funds will pay the annual rate of up to 0.25% of the daily net assets of each Fund's Investor Class shares for activities primarily intended to result in the sale of those shares and for related shareholder servicing. These activities include reimbursement to entities for providing distribution and shareholder servicing with respect to each Fund's shares. Because the 12b-1 fees are paid out of the Funds' assets on an on-going basis, these fees, over time, will increase the cost of your investment and may cost you more than paying other types of sales charges. The Institutional Class shares are sold without the imposition of 12b-1 fees.

Shareholder Services Plan. Each of the Funds have adopted a shareholder services plan with respect to its Investor and Institutional Class shares. Under a shareholder services plan, each of the Funds may pay an authorized firm up to 0.25%

on an annualized basis of daily net assets attributable to its customers who are shareholders. For this fee, the authorized firms may provide a variety of services, including, but not limited to: (i) arranging for bank wires; (ii) responding to inquiries from shareholders concerning their investment in the Funds; (iii) assisting shareholders in changing dividend options, account designations and addresses; (iv) providing information periodically to shareholders showing their position in shares; (v) forwarding shareholder communications from the Funds, such as proxies, shareholder reports, annual reports, and dividend distribution and tax notices, to shareholders; (vi) processing purchase, exchange and redemption requests from shareholders and placing orders with the Funds or their service providers; (vii) providing sub-accounting with respect to shares beneficially owned by shareholders; and (viii) processing dividend payments from the Funds on behalf of shareholders.

Because the Funds have adopted the shareholder services plan to compensate authorized firms for providing the types of services described above, the Funds believe the shareholder services plan is not covered by Rule 12b-1 under the 1940 Act, which relates to payment of distribution fees. The Funds, however, follow the procedural requirements of Rule 12b-1 in connection with the implementation and administration of each shareholder services plan.

An authorized firm generally represents in a service agreement used in connection with the shareholder services plan that all compensation payable to the authorized firm from its customers in connection with the investment of their assets in the Funds will be disclosed by the authorized firm to its customers. It also generally provides that all such compensation will be authorized by the authorized firm's customers.

The Funds do not monitor the actual services being performed by an authorized firm under the plan and related service agreement. The Funds also do not monitor the reasonableness of the total compensation that an authorized firm may receive, including any service fee that an authorized firm may receive from the Funds and any compensation the authorized firm may receive directly from its clients.

Shareholder Servicing. Certain Financial Intermediaries that maintain "street name" or omnibus accounts with the Funds provide sub-accounting, recordkeeping and/or administrative services to the Funds and are compensated for such services by the Funds. These service fees may be paid in addition to the fees paid under the 12b-1 Plan. For more information, please refer to the SAI.

Broker dealers may charge commissions on "clean shares" that are separate and apart from commissions which would normally be charged by a Fund, and the Funds may also waive 12b-1 fees for eligible accounts that invest in "clean shares".

FINANCIAL HIGHLIGHTS

Applied Finance Dividend Fund

The financial highlights table is intended to help you understand the Dividend Fund's financial performance for the past five fiscal years. Certain information reflects financial results for a single Fund share. The total returns in the table represent the rate that an investor would have earned (or lost) on an investment in Institutional or Investor shares of the Dividend Fund (assuming reinvestment of all dividends and distributions).

The financial highlights for the periods presented have been audited by Tait, Weller & Baker LLP, independent registered public accounting firm, whose unqualified report thereon, along with the Dividend Fund's Form N-CSR and are incorporated by reference into the SAI. Additional performance information for the Fund is included in the annual and semi-annual reports. The Fund's Form N-CSR and the SAI are available at no cost from the Fund at the address and telephone number noted on the back page of this prospectus. The following information should be read in conjunction with the financial statements and notes thereto.

Copies of these reports and other information regarding the Funds are available in the EDGAR Database on the SEC's website at www.sec.gov, or copies of this information may be obtained, after paying a duplicating fee, by electronic request at the following e-mail address: publicinfo@sec.gov.

Investment Company Act #811-22172

Privacy Notice

The following is a description of the Funds' policies regarding disclosure of nonpublic personal information that you provide to the Fund or that the Fund collects from other sources. In the event that you hold shares of the Funds through a broker-dealer or other financial intermediary, the privacy policy of your financial intermediary would govern how your nonpublic personal information would be shared with unaffiliated third parties.

Categories of Information the Funds Collects. The Funds collect the following nonpublic personal information about you:

- Information the Funds receive from you on or in applications or other forms, correspondence, or conversations (such as your name, address, phone number, social security number, assets, income and date of birth); and
- Information about your transactions with the Funds, its affiliates, or others (such as your account number and balance, payment history, parties to transactions, cost basis information, and other financial information).

Categories of Information the Funds Disclose. The Funds do not disclose any non-public personal information about their current or former shareholders to unaffiliated third parties, except as required or permitted by law. The Funds are permitted by law to disclose all of the information it collects, as described above, to their service providers (such as the Funds' custodian, administrator and transfer agent) to process your transactions and otherwise provide services to you.

Confidentiality and Security. The Funds restrict access to your nonpublic personal information to those persons who require such information to provide products or services to you. The Funds maintain physical, electronic, and procedural safeguards that comply with federal standards to guard your nonpublic personal information.

The Funds' Privacy Notice is not part of this prospectus.
